

What is claimed is:

*Sub Q1*

1. A device to secure medical tubing to a body comprising a fabric band having at least a first closed loop and a second closed loop, wherein the first closed loop fits elastically around a portion of the body and the second closed loop is capable of receiving and holding medical tubing close to the body.

2. A device according to claim 1 wherein the portion of the body around which the first closed loop fits is a head.

3. A device according to claim 1 wherein fabric band is covered with a soft, non-irritating material.

4. A device according to claim 1 wherein the fabric band is at least partially lined with a friction creating material.

*Sub Q2*

5. A device according to claim 1 wherein the fabric band is of one piece having stitching to form the closed loops.

6. A device to secure medical tubing to a body comprising a fabric band having a first closed loop, a second closed loop and a third closed loop, wherein the first closed loop fits elastically around a portion of the body and the second and third closed loops are capable of receiving and holding medical tubing close to the body.

7. A device according to claim 6 wherein the portion of the body around which the first closed loop fits is a head.

8. A device according to claim 6 wherein fabric band is covered with a soft, non-irritating material.

9. A device according to claim 6 wherein the fabric band is at least partially lined with a friction creating material.

10. A device according to claim 6 wherein the fabric band is of one piece

*Sub  
A3}* having stitching to form the closed loops.

11. A device to secure medical tubing to a body comprising a one piece fabric band having a width wherein stitching along the width joins portions of the band to form a first closed loop, a second closed loop and a third closed loop, and wherein the first closed loop fits elastically around a portion of the body and the second and third closed loops are capable of receiving and holding medical tubing close to the body.

12. A device according to claim 11 wherein the portion of the body around which the first closed loop fits is a head.

13. A device according to claim 11 wherein fabric band is covered with a soft, non-irritating material.

14. A device according to claim 11 wherein the fabric band is at least partially lined with a friction creating material.
